

Sprint 2 Report - EK Health - February 15, 2016

Actions to stop doing:

- Putting off other projects and get swamped with work causing a lack of progress on this project.

Actions to start doing:

- The team members need to communicate our research findings and ideas with our product owner.
- We need to spread our workload over the course of the week instead of doing it over the weekends.

Actions to keep doing:

- The team should continue to learn Android Studio and Java.
- The team should keep researching the Sphinx API.
- The team should keep up the communication over trello making sure everyone in the team is up to speed.
- The team members need to keep establishing meeting times outside of lab to work on the project.

(Everything in this section is based on the trello board before things will be moved around, i wasn't there on saturday so i don't know what got done.)

Work Completed/Not Completed:

List of user stories that were completed:

- [5] As developers, we need to understand Android Studio and its basic functionality.
- [8] As developers, we need to check when network is on or off
- [5] Implement Google Speech when network is available.
- [5] As a user I would like to know when Sphinx is ready
- [5] As a user I would like to have separate screens for offline and online mode.

List of user stories that were not completed:

- [20] As developers we need to find out how to train sphinx.
 - Just didn't actually train it more than $\frac{2}{3}$ of this story was done
- [8] As developers, understand the sphinx API for offline usage.
 - Didn't make it more accurate but got it working so $\frac{1}{2}$ of this was done

Work Completed Rate:

Backlog / User Stories

Network Connectivity - As software engineers, we want to maintain data consistency between the client and the server in possibly volatile network conditions.
